February 18, 1998

Mr. William Drury  
Postmaster  
301 N. Prairie  
Bloomfield, MO 63825

Dear Mr. Drury:

The department is required to review all mailboxes on federal aid construction projects for compliance with approved mailbox supports and to advise the local postmaster of those not meeting approved criteria.

There are several mailbox supports on Route 25 that do not meet federal requirements. The attached list shows the location of these substandard mailboxes by roadway stationing and their direction right (west) or left (east) from centerline. The project limits start at the Route OO & 25 intersection south of Advance and continues south to the four land divided section of Route 25 in Bloomfield.

We request your assistance in requiring mail patrons at these locations to comply with national standards and reduce the potential safety hazard.

Copies of various approved mailbox supports are attached.

The widening and resurfacing of Route 25 through the above mentioned section is scheduled for 1999. Your cooperation in this matter will be appreciated. If we can be of any further assistance, please contact Shelby Gordon of this office at (573) 472-5295

Sincerely,

Shelby Gordon  
Senior Highway Designer
